Art Unit: 2154

1. Claims 1-24 are presented for examination.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Hawkins (6,000,000).
4. The rejection is incorporated by reference from the action mailed 05/25/2005.

Applicant argues Hawkins states that each library performs a synchronization for one particular application. In other words, each library performs a synchronization of the databases that are used by a particular application. Column 3, lines 15-26 do not teach or fairly suggest determining whether the application needs to be updated, but alone providing to the handheld device an application update. Applicants assert the Final Office Action rejections of the claims are in error.

Hawkins expressly states The hotsync memory resident program first consults a sync registry that contains a list of conduit libraries that are used to synchronize different applications on the personal computer system and the palmtop computer system. Therefore Hawkins states the system is used to update applications.
